

# The Johannesburg Roads Agency (Pty) Ltd Environmental Management Policy

The Managing Director and the Executive Management Team of the Johannesburg Roads Agency recognises the importance of protecting the environment and are committed to environmentally sound practices in their quest to becoming a world class roads service manager. The Johannesburg Roads Agency is committed to future sustainability, improving their environmental performance and managing resources effectively and efficiently.

In order to achieve this, the Johannesburg Roads Agency will develop and implement an Environmental Management System. The following principles will underpin the development and the implementation of System intended to contribute towards sustainable environmental performance.

The Johannesburg Roads Agency will:

- Comply with, and contribute to, the City of Johannesburg's Environmental Management Framework;
- Be proactive and strive towards ISO 14001:2004 accreditation;
- Comply with all applicable laws, regulations and requirements that relate to the Environment;
- Plan for continual improvement in environmental performance;
- Ensure an environmentally informed approach to business activities, within the City of Johannesburg, in order to minimise negative impacts and enhance positive impacts;
- Protect the environment from harmful pollution and commit to pollution minimisation and prevention;
- Conduct its activities in a manner that reduces waste production, consumes resources optimally and is informed by benchmark practices, research and development;
- Adopt strategies, alternate technologies and work methodologies that encourage long term sustainability and improved process efficiencies;
- Consult with employees, local communities, customers, government officials and other stakeholders; and
- Ensure that its employees and contractors are aware of this policy and their relevant responsibilities.

The successful attainment of these objectives will require full dedication and cooperation of Management, Employees, Contractors and Suppliers.
