MEDIA RELEASE

17 March 2011

### **JRA'S KHENDLA MA-POTHOLE PROJECT CREATING JOBS BY ERADICATING POTHOLE**

Since its launch, the Johannesburg Roads Agency's unique *Khendla Ma*-Pothole Project has already closed about 4 154 potholes within the City of Johannesburg. In the process, the project has created 196 employment opportunity mostly for young people.

The Kendla Ma-Pothole project was first launched in Ivory Park on the 6 January this year where the work begun. Since the launch, the project is been rolled into out into all the areas identified in all the City's regions.

*Khendla* ma-Pothole, meaning eradication of potholes, is a project intending to deal with and eradicate the potholes problem that the City has been faced with.

The project is aimed at, among others:

- Creating employment through the Expanded Public Works Program (EPWP);
- Expediting service delivery in the city;
- Working towards the eradication of potholes;
- Contributing to the skills transfer and towards the socio-economic development of the local people.

Whereas the JRA remains committed to sustainable service delivery, without the community's involvement all the hard work would go to waste. Accordingly, the JRA wishes to urge the citizens of the City of Johannesburg to safeguard the infrastructure that exists within the City. To this end, communities are urged not to:

1. Illegally dig the roads for purposes of pitching tents;
2. Illegally dig roads to create illegal speed humps;
3. Steal or vandalize the City's infrastructure.

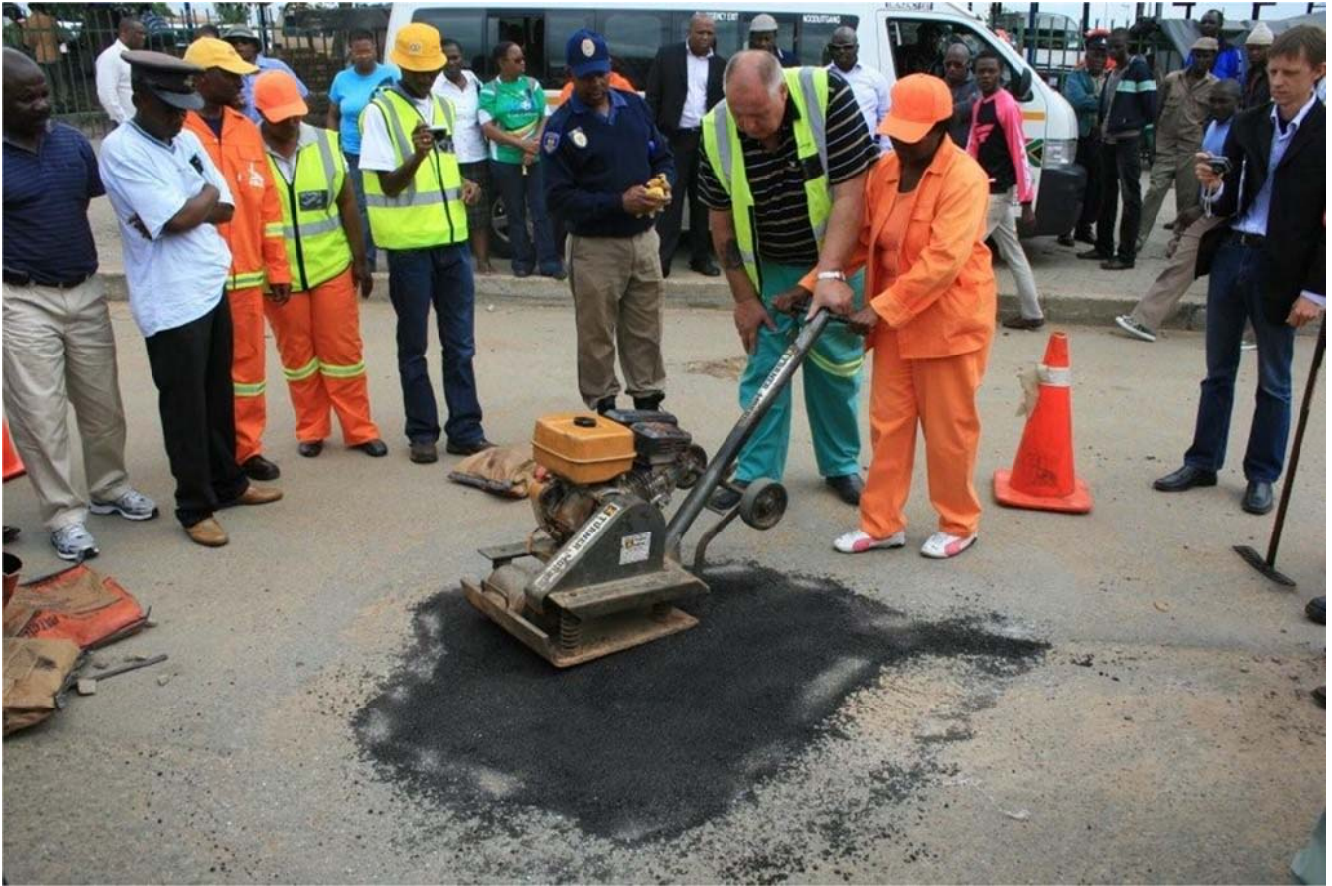

The JRA is a municipal-owned entity responsible for the planning, design, construction and maintenance of roads and roads infrastructures in the City.
