

NOTICE TO CURRENT AND PROSPECTIVE SUPPLIERS

The JRA is committed to encourage creation of employment through the use of SMMEs, black economic empowerment and social development.

The JRA is always trying to improve the relationship between themselves and suppliers and is therefore in the process of rolling out a new supplier database system that will assure the fair awarding of business to our suppliers.

The new system will have a lot of enhanced features and will be a web-based system. The JRA is making every effort to keep up with technology and is proud of this new development. The new system will be rolled out in August 2009.

All suppliers can keep an eye out for more news that will soon be published in this regard. As soon as the system is up and running, the JRA will invite all current and prospective suppliers to register on the new database.
