SCOPE OF WORK

1. PURPOSE

The purpose of the Request for Quotations is to appoint a service provider for the Provision of air quality baseline assessments at the Johannesburg Roads Agency Asphalt Plant, in order to meet the required Atmospheric Ambient Air Quality emission standards in terms of section 21 of NEMA: Air Quality Air Act, 2004 (Act No. 30 of 2004) Subcategory 5.10 Macadam Preparation.

2. SCOPE OF WORK –SPECIFICATION

AIR QUALITY ASSESSMENT - JRA ASPHALT PLANT

3. BACKGROUND

The new Air Quality Act of 2004 (AQA) requires facilities whose activities result in atmospheric emissions to monitor and report emission levels on a regular basis in order to ensure compliance with emission standards. The JRA Asphalt Plant is expected to comply with the AQA requirements by developing a framework within which it can operate. As part of this process, the JRA is undertaking air pollution emission measurement project to quantify pollutant emission trend, Compliance audit, greenhouse gas emission concentrations of pollutants from Asphalt Plant.

4. PROPOSAL OBJECTIVE

The main objective of the measurement programme is to measure and quantify the concentrations of various pollutants such as Particulate Matter (PM10), Sulphur Dioxide (SO2), Total Volatile Organic Compound (VOC) from vapour recovery/destruction units, Pollutant emission trend, Compliance audit, indicators on greenhouse gas (GHG) emissions as well as ozone-depleting substances, NOx, and other significant air emissions from Asphalt Plant.

Dust control assessment (10 Dust samplers for a period of three months) should also be carried out to meet the dust regulation requirement in terms of NEMA: Air Quality Act, 2004 (Act No. 39 of 2001), National Dust Regulation (include sampling stands). The JRA Asphalt plant is required to meet the requirements of the Atmospheric Ambient Air Quality emissions standards in terms of section 21 of NEMA: Air Quality Act 89 of 2004 and National Dust Regulation.

5. SCOPE

The measurement of one (1) stack emissions will involve taking representative samples of each pollutant and laboratory analysis for quantification. Monitoring will cover Particulate Matter (PM10), SOx, and Volatile Organic Compound including indicators on greenhouse gas (GHG) emissions as well as ozone-depleting substances, NOx and other significant air emissions.
The project will also involve the assessment of dust levels around the boundary line of the Asphalt Plant and mitigating measures.

The resultant emission levels will indicate whether the processes are in compliance with the Air Quality Act (AQA) requirements and National Dust Regulation. The Dispersion modelling will give an indication of the impact of the process on the atmosphere. Based on the outcomes of the project the JRA will implement proposed recommendations and ensuring continued compliance with AQA requirements.

6. DELIVERABLES

The key deliverables of the project will include but not limited to the following:

- The appointment of the successful Service Provider will be required to submit work plan, which will be agreed upon with the JRA. The plan is to include an outline of the various reporting stages leading up to the completion of the project.
- Interview and investigate the capabilities and limitations of the JRA in dealing with emissions from their processes
- Measurement of, asphalt plant stack emissions, including indicators on greenhouse gas (GHG) emissions as well as ozone-depleting substances, NOx and other significant air emissions, which will involve taking representative samples of each pollutant; and
- Dust control assessment (10 Dust samplers for a period of three months) for three months
- Pollutant emission trends,
- Air quality Compliance audit,
- Laboratory analysis for pollutant quantification. Equipment shall have valid calibration certificate where applicable.
- Outline the methodology that will be employed to implement the specified scope of work.
- Written data analysis report detailing the emission concentrations of each pollutant; and
- A PowerPoint presentation of the outputs of the project (copy available for the City of Johannesburg) explaining findings, challenges and recommended mitigations measures
- Prepare a framework document with recommendations to implement cleaner production based on the results from bullet 2. above, that will serve as a guiding note and to assist the JRA to reduce emissions
- The Service Provider must provide the JRA officials with a hard copy, and an electronic copy of the final documents and spreadsheets of data collected. The electronic copy must be produced in MS Word and data in MS Access and MS Excel Spreadsheets.

From 1 November 2014, the paper-based tax clearance certificates (TCC) issued by SARS will be gradually phased out and replaced with an electronic Tax Compliance Status (TCS) system. The system allows for the online real-time verification of a person’s compliance status. From 1 April 2015 SARS will no longer issue paper based tax clearance certificates.

Any person who requires his or her tax compliance status to be disclosed to a Government institution or department, for purposes of submitting a bid or to confirm its good standing after the phasing out of paper based TCCs must request a unique security personal identification number (PIN) from SARS.

Very important to note is that the disclosure of a bidder’s tax compliance status is an express condition for all acceptable Government bids. Failure to make the relevant disclosures will invalidate your bid and your response will be null and void.

The Government institution or department must use the PIN referred to above (after implementation of the new system) to verify a person’s tax compliance status with SARS. Remember that bids that are submitted in the transitional period may be accompanied by a valid original paper based tax clearance certificate, however successful bidders who are awarded contracts on a paper based TCC must warrant that they will, on request by the Government institution or department, provide a PIN for the Government institution or department to verify their tax compliance status.

Bid rigging is, therefore, an agreement between competitors not to compete.

This Municipal Bidding Document (MBD) must form part of all bids invited. It contains general information and serves as a declaration form for local content (local production and local content are used interchangeably).

Before completing this declaration, bidders must study the General Conditions, Definitions, Directives applicable in respect of Local Content as prescribed in the Preferential Procurement Regulations, 2017, the South African Bureau of Standards (SABS) approved technical specification number SATS 1286:2011 (Edition 1) and the Guidance on the Calculation of Local Content together with the Local Content Declaration Templates [Annex C (Local Content Declaration: Summary Schedule), D (Imported Content Declaration: Supporting Schedule to Annex C) and E (Local Content Declaration: Supporting Schedule to Annex C)].

1. General Conditions

1.1. Preferential Procurement Regulations, 2017 (Regulation 8) make provision for the promotion of local production and content.

1.2. Regulation 8.(2) prescribes that in the case of designated sectors, organs of state must advertise such tenders with the specific bidding condition that only locally produced or manufactured goods, with a stipulated minimum threshold for local production and content will be considered.

1.3. Where necessary, for tenders referred to in paragraph 1.2 above, a two stage bidding process may be followed, where the first stage involves a minimum threshold for local production and content and the second stage price and B-BBEE.

1.4. A person awarded a contract in relation to a designated sector, may not sub-contract in such a manner that the local production and content of the overall value of the contract is reduced to below the stipulated minimum threshold.

1.5. The local content (LC) expressed as a percentage of the RFQ price must be calculated in accordance with the SABS approved technical specification number SATS 1286: 2011 as follows:

\[ LC = \left[ 1 - \frac{x}{y} \right] \times 100 \]

Where

- \( x \) is the imported content in Rand
- \( y \) is the RFQ price in Rand excluding value added tax (VAT)
Prices referred to in the determination of x must be converted to Rand (ZAR) by using the exchange rate published by South African Reserve Bank (SARB) at 12:00 on the date of advertisement of the bid as indicated in paragraph 4.1 below.

1.6. A RFQ may be disqualified if this Declaration Certificate and the Annex C (Local Content Declaration: Summary Schedule) are not submitted as part of the bid documentation;

2. The stipulated minimum threshold(s) for local production and content (refer to Annex A of SATS 1286:2011) for this RFQ is/are as follows:
